

02-13 July 2012

**Protea Waterfront Hotel
Centurion**

Basic COURSE IN ELECTRONIC EAVESDROPPING COUNTERMEASURES

The course in electronic eavesdropping countermeasures, presented since 1998, is suitable for the individual who has no or little previous experience in technical surveillance countermeasures (TSCM). The 80-hour course is presented over ten (10) working days. The course has been designed to allow prospective technical surveillance countermeasures practitioners and security managers to develop the necessary basic knowledge and skill to provide countermeasures services and consultation for their companies.

The course will introduce the attendee to the technical and real life status of current eavesdropping threats and ways to detect and counter them.

All phases of electronic countermeasures are covered and hands-on experience is acquired through the use of various manufacturers' equipment.

At the completion of the course the attendee will be able to:

- Analyse electronic vulnerabilities in office and residential environments;
- Evaluate equipment performance and make informed purchasing decisions;
- Be able to select and appoint outside technical surveillance countermeasures consultants;
- Perform electronic eavesdropping surveys (sweeps); and
- Advise management/clients/customers regarding the protection of business information, technical countermeasures services, policies and procedures.

This is a unique course aimed at assisting companies and government departments to protect their information against the latest electronic espionage and snooping attacks.

We are one of a few institutions in the World offering

technical surveillance countermeasures training courses. We also offer an advanced course in this specialised field. Many from the UK, Middle and Far East, Europe, Australia, Africa and South Africa have attended this course. **The advanced course is scheduled from 23 July – 03 August 2012 in Centurion.**

You should consider attending this course if you are:

- Responsible for the protection of information;
- Offering technical surveillance countermeasures services;
- Employ or sub-contract technical surveillance countermeasures service providers;
- Responsible for risk or loss control functions in your company; or are
- Interested to learn more about this specialised field.

The cost to attend this two week course is R 22 572.00 (Including VAT) per person, excluding accommodation.

We have negotiated a discount accommodation deal with the Protea Waterfront Hotel should you wish to stay at the hotel for the duration of the course. The cost to attend the two week course, including accommodation (Sunday – Friday, both weeks) is R 36 392.00 (Including VAT) per person.

If you book four people from the same company or department, a fifth person can attend the course for free. (The discount is not applicable on the accommodation portion).

You are also welcome to contact us for additional information. Please visit our web pages at www.tscm-za.com for more information about our equipment and services on offer.
